

AVK SURFACE BOXES MULTI PURPOSE

The AVK surface box range is extended with the new height adjustable and optimized fixed height surface box Multi Purpose (MP). It's all in the name, the surface box MP is suitable for multiple application areas and can be installed in both gas and water distribution networks.

The surface box MP housing is made of high grade Polyamide material making it heat resistant up to 250 °C. Using a new surface box MPV (height adjustable) ensures a perfect installation in tarmac.

FEATURES

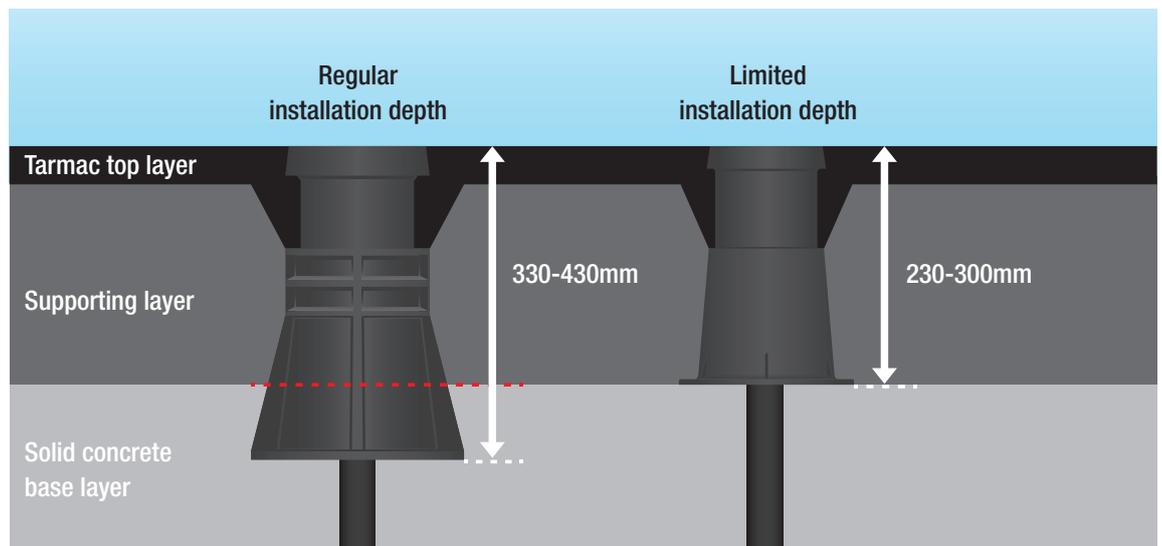

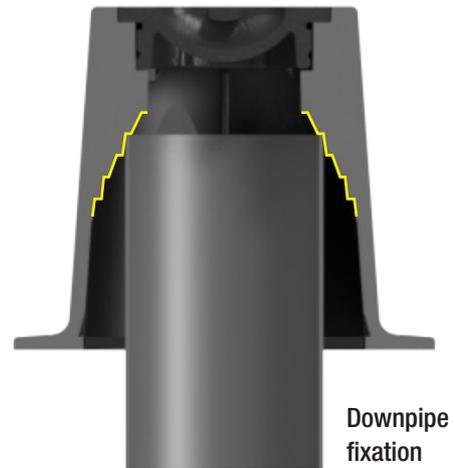

- Lightweight, maintenance free and noiseless design
- 100% recyclable and less use of energy resources compared to traditional materials
- Selected materials for housing and lid ensure easy opening at all times
- Various colours and lid inscriptions possible
- Heat resistant to max. 250 °C
- Limited installation depth required
- Click system ensuring lid will stay in place
- Galvanized steel cable attaches lid to surface box
- Height adjustable and flexible positioning of top part (MPV)
- No costly corrections after installation (MPV)
- Acceptance and fixation of down pipes directly in surface box (MP)

AVK SURFACE BOXES MULTI PURPOSE

The fixed height surface box MP allows a fixation of down pipes \varnothing 75, 90, 98, 110 and 118mm directly in the surface box.

Furthermore, the multi-functional box has a click system ensuring the lid will stay in place when traffic drives over. Because of the relatively small size only a limited installation depth is required.

Since many years, AVK is one of the frontrunners in the development, production and sales of height adjustable surface boxes. A suitable solution for installation in tarmac.

For some tarmac roads, conventional height adjustable surface boxes are too high, e.g. roads consisting of a solid concrete base layer or tarmac layers with insufficient thickness. AVK's height adjustable surface box MPV is specially designed for tarmac roads with limited installation depth.
